XF

XF – the system platform. Its essence: utility and beauty.
The philosophy: the world has different needs, which it meets with innovation, versatility and dynamism.

The name: XF. X is the variable that adjusts to the personal needs of the user. F stands for flow – the stat of productive harmony, and the harmonious combination of motivation and attention.

2011 XF writes a new chapter in Swiss design history. Following this tradition it creates with the courage of reduction, unique objects of value with global charisma.
